

How do I setup Outlook Express for e-mail?

To set up Outlook Express with your Comcast.net user name and password, follow the steps outlined below.

1. Open Outlook Express by double-clicking the **Outlook Express** icon on your desktop

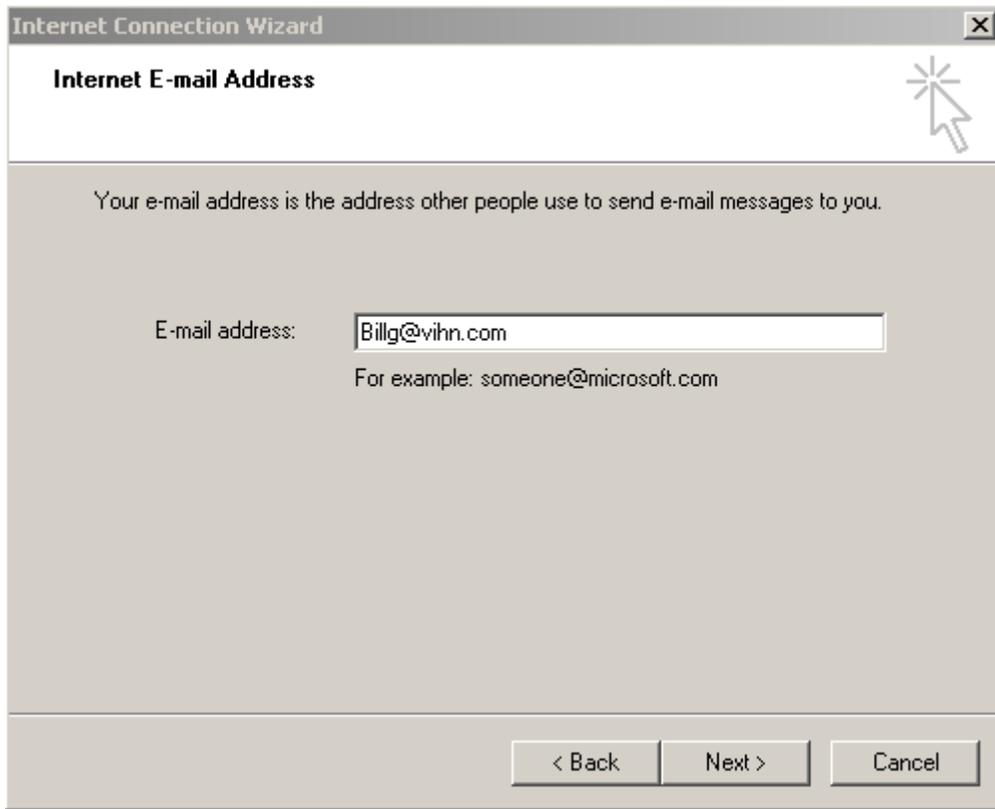

2. The first time you start Outlook Express the **Internet Connection Wizard** will run. Select **Create a new Internet mail account** and click **Next** to continue. **Note: If this doesn't occur you will have to go to Tools | Accounts. Once in accounts you have to click on the Mail tab then over to the right you will see an Add button click that then press mail.**

3. On the **Your Name** screen type in your name as you would like it to appear on your outgoing e-mail messages and click **Next** to continue

4. Type in your **name@yourdomainname.com** (Example brady@vihn.net) e-mail address on the **Internet E-mail Address** screen. Click **Next** to continue

4. On the **E-mail Server Names** screen, select **POP3** from the drop down list. In the space provided below **Incoming mail (POP3, IMAP or HTTP) server:** enter **207.189.145.90**. Type in **smtp: 207.189.145.90** as your **Outgoing mail (SMTP) server:** and click **Next** to continue.

The screenshot shows a window titled "Internet Connection Wizard" with a close button in the top right corner. The main title of the dialog is "E-mail Server Names". In the top right corner of the dialog area, there is a mouse cursor icon pointing at a starburst symbol. The main content area contains the following text and fields:

My incoming mail server is a server.

Incoming mail (POP3, IMAP or HTTP) server:

An SMTP server is the server that is used for your outgoing e-mail.
Outgoing mail (SMTP) server:

At the bottom of the dialog, there are three buttons: "< Back", "Next >", and "Cancel".

5. On the **Internet Mail Logon** screen, type in your Comcast user name in the field titled **Account name:** Your user name is everything leading up to, but not including the **name@yourdomainname.com** part of your e-mail address. For example, if your e-mail address is **name@yourdomainname.com**, you would enter **email address** as your **Account name:**. In the **Password:** enter the password **Vihn Sent you**. If you do not wish to enter your password every time you check your e-mail, put a check in the box labeled **Remember password**. Click **Next** to continue

The image shows a screenshot of the 'Internet Connection Wizard' dialog box, specifically the 'Internet Mail Logon' step. The window title is 'Internet Connection Wizard' and the subtitle is 'Internet Mail Logon'. The main text reads: 'Type the account name and password your Internet service provider has given you.' There are two input fields: 'Account name:' with the text 'Name@yourdomain.com' and 'Password:' with a masked password '*****'. Below the password field is a checked checkbox labeled 'Remember password'. A paragraph of text explains: 'If your Internet service provider requires you to use Secure Password Authentication (SPA) to access your mail account, select the 'Log On Using Secure Password Authentication (SPA)' check box.' Below this is an unchecked checkbox labeled 'Log on using Secure Password Authentication (SPA)'. At the bottom, there are three buttons: '< Back', 'Next >', and 'Cancel'. A mouse cursor is visible over the top right corner of the dialog box.

6. Congratulations, you have now set up Outlook Express as your e-mail program. Click **Finish** to begin sending and receiving e-mail
